1 Synchronization in multimedia data retrieval   80%
Anna Haj Haċ , Cindy X. Xue
International Journal of Network Management January 1997
Volume 7 Issue 1
> Synchronization of multiple medium streams in real time has been recognized as one of the most important requirements for multimedia applications based on broadband high-speed networks. This article presents a complete synchronization scheme for distributed multimedia information systems. © 1997 John Wiley & Sons, Ltd.

2 An intelligent media browser using automatic multimodal analysis   77%
Jonathan Foote , John Boreczhy , Andreas Girgensohn , Lynn Wilcox
Proceedings of the sixth ACM international conference on Multimedia September 1998

3 Dealing with synchronization and timing variability in the playback of   77%
interactive session recordings
Nelson R. Manohar , Atul Prakash
Proceedings of the third ACM international conference on Multimedia January 1995

4 Towards intelligent recognition of multimedia episodes in real-time   77%
applications
J. Gabbe , A. Ginsberg , B. Robinson
Proceedings of the second ACM international conference on Multimedia October 1994
> The ability to automatically capture and index multimedia information for later perusal and review is critical to the success of future multimedia services. In this paper, we describe how to automatically generate indexes of real-time streams without requiring
